RdSAP, existing dwelling

Date of certificate:

18 April 2012

Total floor area:

37 m²

Use this document to:

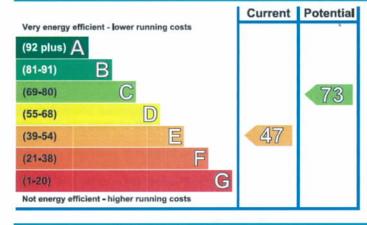

- Compare current ratings of properties to see which properties are more energy efficient
- Find out how you can save energy and money by installing improvement measures

Estimated energy costs of dwelling for 3 years:	£2,226
Over 3 years you could save	£1,095

Estimated energy costs of this home **Current costs** Potential costs Potential future savings £102 over 3 years Lighting £93 over 3 years £1,794 over 3 years £648 over 3 years Heating You could Hot Water £339 over 3 years £381 over 3 years save £1.095 over 3 years Totals £2,226 £1.131

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances like TVs, computers and cookers, and any electricity generated by microgeneration.

Energy Efficiency Rating

The graph shows the current energy efficiency of your home.

The higher the rating the lower your fuel bills are likely to be.

The potential rating shows the effect of undertaking the recommendations on page 3.

The average energy efficiency rating for a dwelling in England and Wales is band D (rating 60).

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years	Available with Green Deal
